

How does SLOPE compare to the Prophet actuarial platform?

Cloud Computing

Automatic software updates	✓
SOC 2 & ISO compliant	✓
Single Sign On and Two Factor Authentication	✓
Zero installation requirements	✓
Fully cloud-native platform	✓
Comprehensive licensing	✓

Assumption Management

Experience Study capabilities	✓	Additional product
Import, edit, and organize model assumptions	✓	✓
Complete audit log of run assumptions	✓	✓
Automatic tracking and versioning of assumptions	✓	Enterprise only

Model Development

Unlimited data storage	✓	
Proprietary coding language required		✓
Shared workspace for remote collaboration	✓	
Fully customizable calculations	✓	✓
Pre-built library of products	✓	✓
Explore variable relationships for a full-model view	✓	✓

Model Execution

Scalable cloud architecture for large compute needs	✓	Enterprise only
Included allowance of compute time with licensing	✓	
Automatic spin-up, scaling, and teardown of servers	✓	Additional product
No uploading models or downloading results required	✓	
High Performance Computing capabilities	✓	

Reporting

Built-in customizable reporting suite with data visualization	✓
Snowflake integration capabilities	✓
Result and visual sharing	✓
Powerful debugging, drill down functionality	✓
Automatic policy level output	✓
Robust cohorting and aggregation capabilities	✓
